

The prepping on a budget kit contains:

1. Labels for your prepping supplies that will help you keep track of the **expiration date and rotation date**. Rotate well before the expiration date so you can use the supplies at home without wasting or throwing away anything.
2. A simple, but effective table that will help you build your own prepping list and keep track of rotation schedules and item prices (for when you need to buy a new batch).
3. [SelfHelp.institute](#) 's own prepping list with average item shelf life and prepping recommendations.

That is not all. We will be adding new items to the **prepping on a budget kit** on a regular basis. So, make sure you are subscribed to our mailing list and check back often.

Prepping Labels

The labels below are for [Avery Label #22827](#). The label size is 3.5x4.75 Inches, which makes them big enough to be seen even when you are in a hurry. They come in packs of 32 and cost \$10 (as of 4.20.2017). Instructions: insert label on your printer as directed and print only page 2 of this document. Here's a document with just the [prepping labels](#) by themselves.
